

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Canceled)
2. (Previously Presented) A pet pack as in claim 20 where said substantially durable material is substantially water resistant.
3. (Previously Presented) A pet pack as in claim 20 where said substantially durable material is soft on said bottom side.
4. (Previously Presented) A pet pack as in claim 20 further comprising an opening which allows a portion of the harness to be accessed.
5. (Currently Amended) A pet accessory comprising, in combination,
a pack comprised of a substantially durable material and including at least one pocket on a top side;
a harness attachment on a bottom side of said pack wherein said harness attachment comprises a first element and a second element to receive a dorsal harness strap of an independent, separate pet harness between said first and second elements wherein said pet harness is unattached to and does not comprise its own pack attachment apparatus;
and further wherein said first element of said harness attachment is placed over said dorsal harness strap and said second element of said harness attachment is attached to said first element to form a substantially tubular receiver to receive said dorsal harness strap and to allow said harness attachment to inhibit substantial lateral movement of said pack across said harness while allowing some movement along a longitudinal length of said harness; and
a securing mechanism attached to said pack.
6. (Original) A pet accessory as in claim 5 where said substantially durable material includes a plurality of pockets.

7. (Original) A pet accessory as in claim 5 where said substantially durable material is substantially water resistant.

8. (Original) A pet accessory as in claim 5 where said substantially durable material is soft on said bottom side.

9. (Original) A pet accessory as in claim 5 further comprising a leash attachment mechanism.

10. (Original) A pet accessory as in claim 5 further comprising an opening which allows a portion of the harness to be accessed.

11. (Currently Amended) A pet accessory comprising, in combination,
a coat comprised of a substantially durable material which substantially covers a pet's body including a pet's head and torso;

a harness attachment on a bottom side of said ~~pack~~ coat wherein said harness attachment comprises a first element and a second element to receive a dorsal harness strap of an independent, separate pet harness between said first and second elements wherein said pet harness is unattached to and does not comprise its own coat attachment apparatus;

and further wherein said first element of said harness attachment is placed over said dorsal harness strap and said second element of said harness attachment is attached to said first element to form a substantially tubular receiver to receive said dorsal harness strap and to allow said harness attachment to inhibit substantial lateral movement of said pack across said harness while allowing some movement along a longitudinal length of said harness; and

a securing mechanism further attached to said pet coat.

12. (Original) A pet accessory as in claim 11 where said substantially durable material includes at least one pocket.

13. (Original) A pet accessory as in claim 11 where said substantially durable material is substantially water resistant.

14. (Original) A pet accessory as in claim 11 where said substantially durable material at least partially covers a pet's head.

15. (Original) A pet accessory as in claim 11 further comprising an opening which allows a portion of the harness to be accessed.

16. (Original) A pet accessory as in claim 11 further comprising a leash attachment mechanism.

17. (Original) A pet accessory as in claim 11 is substantially soft on said bottom side.

18. (Currently Amended) A pet accessory comprising, in combination,
a pack comprised of a substantially flexible, durable material and having a top side with at least one pocket;

wherein said top side further comprises a leash attachment mechanism;
a harness attachment on a bottom side of said pack wherein said harness attachment comprises a buckle with a first element and a second element to receive a dorsal harness strap of an independent, separate pet harness between said first and second elements wherein said separate pet harness is separate from and does not comprise its own pack attachment apparatus;

and further wherein said first element of said harness attachment is placed over said dorsal harness strap and said second element of said harness attachment is attached to said first element to form a substantially tubular receiver to receive said dorsal harness strap and to allow said harness attachment to inhibit substantial lateral movement of said pack across said harness while allowing some movement along a longitudinal length of said harness; and

a securing mechanism attached to said pack which may be adjusted to fit around the abdomen of a pet.

19. (Currently Amended) A pet accessory comprising, in combination,
- a pack comprised of a substantially flexible, durable material and having a top side with at least one pocket;
 - wherein said top side further comprises an opening which exposes a leash attachment mechanism of said harness;
 - a harness attachment on a bottom side of said pack wherein said harness attachment comprises a buckle with a first element and a second element to receive a dorsal harness strap of an independent, separate pet harness between said first and second elements wherein said pet harness is separate from and does not comprise its own pack attachment apparatus;
 - and further wherein said first element of said harness attachment is placed over said dorsal harness strap and said second element of said harness attachment is attached to said first element to form a substantially tubular receiver to receive said dorsal harness strap and to allow said harness attachment to inhibit substantial lateral movement of said pack across said harness while allowing some movement along a longitudinal length of said harness; and
 - a securing mechanism attached to said pack which may be adjusted to fit around the abdomen of a pet.

20. (Currently Amended) A pet accessory comprising, in combination,
- a pack comprised of a substantially durable material;
 - a harness attachment on a bottom side of said pack, wherein said harness attachment comprises a first element and a second element to receive a dorsal harness strap of an independent, separate pet harness between said first and second elements wherein said pet harness is separate from and does not comprise its own pack attachment apparatus;
 - and further wherein said first element of said harness attachment is placed over said dorsal harness strap and said second element of said harness attachment is attached to said first element to form a substantially tubular receiver to receive said dorsal harness strap and to allow said harness attachment to inhibit substantial lateral movement of said pack across said harness while allowing some movement along a longitudinal length of said harness; and

Appl. No. 10/677,571

Amdt. Dated June 28, 2005

Reply to Office Action of March 28, 2005

a securing mechanism further attached to said pack which may be adjusted to fit around the abdomen of a pet.
